GitHub: https://github.com/Dhanunjaya18 Mobile: +91-9346862270

Skills

Languages : C++, Java, Python, SQL
Frameworks & Libraries : Django, Scikit-Learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn
Developer Tools : Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Core CS : Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS, OOPs
Soft Skills : Problem-Solving, Persistence, Self-motivation

Projects

Campus Lost & Found Portal | GitHub Jan'26 – Feb'26

- Developed a **Django-based backend platform** to manage user workflows, including item tracking, ownership claims, and interaction management through **RESTful request handling and database models**.
- Enabled structured coordination between users by implementing an integrated **real-time chat module using asynchronous request handling and persistent message storage**.
- Designed backend logic and **relational database schemas** to ensure consistent data handling and efficient **multi-user interaction across shared workflows**.
- **Tech**: Python, Django, SQL (SQLite), HTML, CSS, Bootstrap

AI Classroom Doubt Detector | GitHub Oct'25 – Nov'25

- Built an **ML-powered platform** that automatically **clusters student doubts** using **NLP techniques**, helping teachers identify **frequently asked topics** and reduce duplicate queries.
- Implemented **TF-IDF vectorization** and **cosine similarity** to detect related questions and analyze similarity between doubts.
- Developed **student and teacher dashboards** with doubt submission, upvoting, and analytics visualization.
- **Tech:** Python, Django, Scikit-learn, NLP (TF-IDF, Cosine Similarity), SQLite, JavaScript

Mini Redis – In–Memory Key–Value Store | GitHub Jun'25 – Aug'25

- Built a **low-latency in-memory data engine** using optimized **data structures** for fast **storage and retrieval operations**.
- Implemented a **multithreaded TCP server** to handle **concurrent client connections**.
- Designed efficient **data structures** for optimized **command execution** and **scalable request handling**.
- **Tech**: C++, Sockets, Data Structures, Multithreading, TCP Server Programming

Training

Machine Learning & Data Science Training | Cipher Schools Jun'25 – Jul'25

- Completed hands-on training in Machine Learning and Data Science, focusing on real-world applications and industry-oriented workflows.
- Gained practical experience with Python for Data Science, Advanced Excel, Power BI, Statistics, and end-to-end Supervised and Unsupervised Machine Learning techniques.
- Applied data preprocessing, feature engineering, and visualization using Matplotlib, Seaborn, and Altair, and developed projects including a CNN-based image classifier and an NLP chatbot.

Certificates

- Generative AI |Oracle Oct'25
- Computer Networking Specialization | Google & University of Colorado (Coursera) Sep'24
- Data Structures & Algorithms | NeoColab Aug'24

Achievements

Solved 290+ LeetCode Problems | LeetCode

- Strengthened problem-solving skills and algorithmic thinking through consistent practice of data structures.

HakerRank C++ Domain (44/44 Problems Solved) | HackerRank

- Improved C++ programming and problem-solving skills by solving problems involving classes, STL, and core programming concepts.

5-Star Problem Solving badge on HackerRank | HackerRank

- Practiced and solved advanced algorithmic challenges using efficient data structures and optimized logic.

Education

Lovely Professional University Phagwara, Punjab
- Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.42** Since August 2023

Sri Chaitanya Junior College Tirupati, Andhra Pradesh
- Intermediate; **Percentage: 97.3%** April 2021 - March 2023

Sri Chaitanya Techno School Kadapa, Andhra Pradesh
- Matriculation; **Percentage: 100%** April 2020 - March 2021
